

COSHH

The Control of Substances Hazardous to Health Regulations 2002, COSHH, known as the Control of Substances Hazardous to Health Regulations, are intended to protect people from ill health caused by exposure to hazardous substances.

What is a Hazardous Substance?

Chemicals classified as hazardous are identified by orange hazard warning symbols on the container e.g. very toxic, toxic, harmful, corrosive etc. Containers that are not marked at all are the reason to be suspicious!

Any substance that has been assigned a workplace exposure limit is considered hazardous as well. Also, **dusts** can become hazardous in concentrations in air greater than 10 mg/m³ inhaled dust, or 4 mg/m³ of respirable dust, also hazardous to health are: **biological agents** such as bacteria, viruses, fungi and parasites, **asphyxiants** such as carbon dioxide and nitrogen, or **carcinogens** such as tobacco smoke or radon gas.

The standard cleaning chemicals used by Donnington Clean and which are listed below have all been assessed within the guidelines set out by the COSHH Regulation:

Spray and wipe	Surface cleaner	Selden	Not classed as hazardous
ACT	Toilet Cleaner	Selden	Not classed as hazardous
B/room Cleaner	Bathroom Cleaner	Selden	Not classed as hazardous
